

FULL STACK DEVELOPMENT INTERNSHIP REPORT

Student Name

Kasim Shah

Technology Used

- HTML5
 - CSS3
 - Bootstrap 5
 - JavaScript
 - Node.js
 - Express.js
 - EJS Template Engine
-

TASK 1: Student Registration Form

Objective

Create a Student Registration Form using Node.js, Express.js and EJS.

Features Implemented

- Student Name Input
- Student Email Input
- Student Mobile Number Input
- Add Student Button
- Dynamic Student List Display

Learning Outcome

Learned how to:

- Create Express Server
 - Handle GET and POST Requests
 - Use EJS Template Engine
 - Store and Display Dynamic Data
-

TASK 2: Form Validation

Objective

Validate user input before storing data.

Validation Implemented

Name Validation

- Name field cannot be empty

Email Validation

- Valid email format required
- Example:
 - Valid → abc@gmail.com
 - Invalid → abcgmail.com

Mobile Number Validation

- Must contain exactly 10 digits
- Only numeric values allowed

Error Handling

Bootstrap Alert messages displayed when validation fails.

Learning Outcome

Learned:

- Server-side validation
 - Regular Expressions (Regex)
 - Error handling in Express.js
-

TASK 3: Student Data Management

Objective

Store and display student information dynamically.

Features Implemented

- Add Student
- Display Student List

- Dynamic Table Rendering using EJS

Learning Outcome

Learned:

- Working with Arrays
 - Dynamic Rendering using EJS
 - Passing Data from Server to View
-

TASK 4: Bootstrap Responsive UI Design

Objective

Create a professional and responsive user interface.

Features Implemented

Navbar

- Responsive Bootstrap Navbar

Card Design

- Registration Form inside Bootstrap Card

Buttons

- Bootstrap Styled Buttons

Table Styling

- Bootstrap Table
- Table Borders
- Striped Rows

Responsive Layout

- Mobile Friendly Design
- Bootstrap Grid System

Learning Outcome

Learned:

- Bootstrap Components
- Responsive Web Design

- Professional UI Development
-

TASK 5: API Integration

Objective

Fetch data from a public API and display it dynamically.

API Used

<https://jsonplaceholder.typicode.com/users>

Features Implemented

- Load Users Button
- Fetch API Data
- Display User Information

Displayed Fields

- Name
- Email
- City

Learning Outcome

Learned:

- Fetch API
 - Async Data Handling
 - Dynamic Table Rendering
 - Working with JSON Data
-

Challenges Faced

1. EJS View Not Found Error
2. Folder Structure Issues
3. Validation Errors
4. Mobile Number Field Handling
5. Bootstrap Integration
6. API Data Rendering

Solutions

- Corrected Views Folder Structure
 - Fixed Express Routing
 - Added Validation Logic
 - Improved Bootstrap Layout
 - Successfully Integrated Public API
-

Conclusion

During this internship, I successfully developed multiple Full Stack Development tasks using Node.js, Express.js, EJS, Bootstrap, and APIs.

The project helped me understand:

- Backend Development
- Frontend Design
- Form Validation
- API Integration
- Responsive Web Development

This internship enhanced my practical knowledge of Full Stack Web Development and improved my problem-solving skills.
